

Dokeos Live Conference®

Avoid plane tickets and get real-life style remote conferences to replace classical training and meeting events.

Dokeos Live Conference® is web based, easy to use, lightweight, running on any computer without the installation of a special plugin.

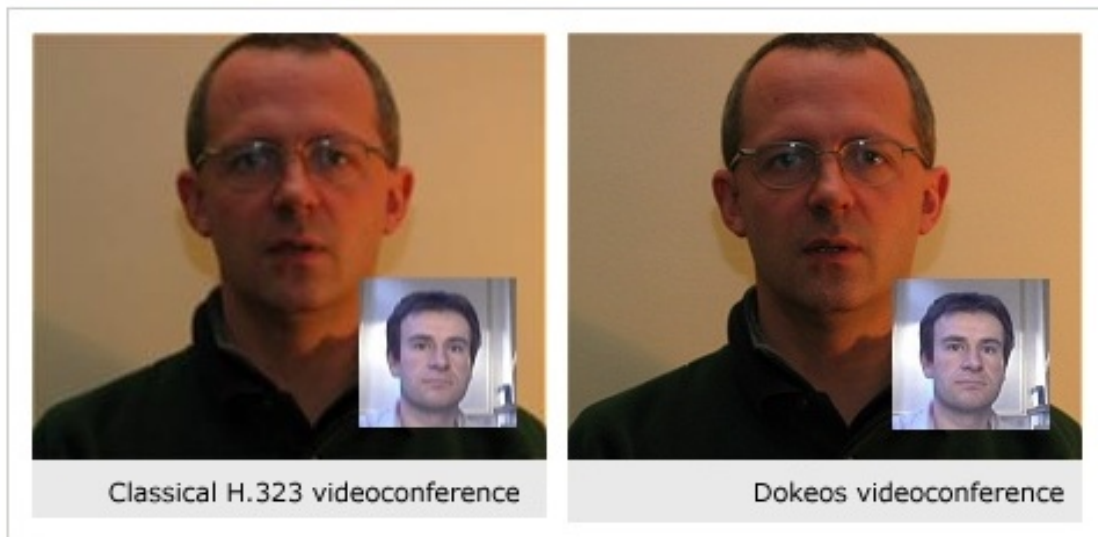

Decide for a date and connect with up to 10 people or groups in the virtual conference room. Then dialogue live, share documents, edit and export them for the follow-up.

Training	Meeting
Share slides, Ms-Office files or any audio or video document.	Pilot your slideshow and defend your project as if facing the audience
Have real video interaction with optimal audio/video synchronisation	Share the meeting programme and adapt it live with your remote partners
Highlight zones, type text or draw on top of shared documents.	Have the minutes typed live and sent by email to the participants.

Why choose Dokeos Live Conference ?

Based on Open Source technology, it is cheaper and safer than any other solution. Running the incredibly advanced Macromedia Flash MX® videoconferencing compression codec, it offers the highest audio/video quality available.
